

SAVE the trees!

SAVE THE TREES

Trees are the most wonderful things in the whole wide world! Let me tell you why. Trees give us air to live, trees give us paper to be creative and trees give us branches to climb and be adventurous, plus we can make fire with branches for warmth. Unfortunately, I think a lot of people chop down trees too much and soon there will be no trees! So here are five ideas to change the world. First idea" if you live near a forest this one will be easy for you. If you are in the forest look around and find anything that is not a tree. Once you find something other than a tree ask yourself can I make anything out of this? If no leave it. If yes bring it with you and try your idea. If your idea works tell everyone you know!! That way a lot of people will talk about your idea because it is so cool! So many people will use your idea instead of chopping down trees and soon not a lot of people will chop trees down! Second idea we can make a holiday called tree day. It can be on August 13th (my birthday!) and every tree day you are not allowed to chop down a tree, instead you appreciate them. That way people can see how important trees really are. Third idea: use paper again and again. Here is an example if you have a paper that says $2+2=4$ and you still have room, use that same sheet again. That way you are saving the trees and not wasting tree wood. Fourth idea: we can make a huge field of trees. Then, decorate the field with flowers and ribbons and put a sign that says "Enjoy the trees, don't chop them down." That way people can see how amazing trees really are. Plus, when people come to the field they can relax and rest with the trees. This way people can just enjoy trees and see how important trees really are. Fifth idea: share this book! If you share this book more people will know about these amazing ideas and every time someone tries one of these amazing ideas, we are closer to changing the world!!!!!!

By: Claire Edwardsen 😊

ABOUT THE AUTHOR

Claire Edwardsen, the author of “Save the Trees,” is a nine-year-old in 3rd grade and she loves trees. She plays many sports such as soccer, basketball, cross country and baseball. She really was excited to make this book and she put her best effort into it. After people read this book, Claire hopes everyone knows more about trees, sees how important they are, and appreciates them she also hopes that you can try these ideas and help change the world.
